

## **RK LEISURE FISHING AND VENUE SPECIFIC RULES**

The following pages cover the rules in place across RK Leisure Venues. They have been purposefully designed to ensure a safe and enjoyable angling experience is available for all members.

The following sections contain rules that are common across all venues as well as a small subset of specific rules for certain venues. Please ensure you study these in detail, we believe they are mostly based on common sense and good angling etiquette as well as ensuring people fish safely for all species at all times.

## **LENGTH OF STAY, FISHING TIMES AND SEASONS**

This section contains the limits on time in swims and also the etiquette required around reserving swims.

1. All members are required to carry their membership card at all times.
2. You are permitted a maximum stay of 3 days/72 hours in one swim, after which you must vacate to a different swim and not return to, or re-bucket the same swim for 96 hours.
3. Similarly, if you fish a swim for 2 days/48 hours and vacate it, you cannot return to, or re-bucket that swim for 72 hours.
4. You are permitted to be away from the venue for no longer than 90 minutes, except under special circumstances and by prior arrangement with RK Leisure Management or one of the Bailiff Team.
5. On arrival, all members have 60 minutes once bucketing a swim to claim it. After 60 minutes the member either enters that swim or his/her bucket can be removed.
6. During their session, an angler wishing to move into another swim can only place a bucket in one other swim (whether occupied or not).
7. Swims must not be bucketed on behalf of other members.
8. If a member is bivvied up on one lake he/she is not allowed to fish another lake.
9. Venues will operate a close season between 9 April – 22 April when members are not permitted access.

## **BAIT, TACKLE AND TACTICS**

11. No rods to be left unattended with baited rigs in the water at any time, rods will be considered to be unattended if any angler is further than the next adjoining swim.

Examples of this in the past have been restricting the use of high oil pellets on the Boat Pool during low oxygen levels and limiting particle use on The Church, when vast quantities were being uneaten. These decisions are taken for the welfare of the fish and venue.
